SUMMON – default tab on library home page search box

- searches across the spectrum of library content: books, scholarly articles, newspapers, audio, video, images, data, government documents, and more; searches most, *but not all*, library resources
- draws from OBIS, full text and article indexing databases, and digital repositories from colleges, universities, research centers, and other open-access archives
- comprehensive or complex searches should be done in subject-specific databases
- OBIS and OhioLINK are generally better for finding books
- if links don't lead to full text, be persistent or ask for help; we sometimes *do* have access
- ☞ search tip #1: select the "Add results beyond your library's collection" option; some of these additional resources may be open access / freely available
- ☞ search tip #2: filter results by "Content type" to find a wide range of digital resource types; many of these categories represent primary source material

DOCUMENTING YOUR SOURCES
